#### Mantenimiento de mamparas de ducha

1. Agregar regularmente lubricante (la grasa adecuada para sistema mecánico) a las ruedas de la ducha hace que el deslizamiento de las puertas sea fácil y suave.
2. Para prevenir y evitar que las puertas de la ducha se desplacen más allá del marco, no ejerza mucha presión y maneje suavemente.
3. Ajuste los tornillos de las ruedas superiores de las puertas de la ducha, para asegurarse que la carga se deslice pareja.
4. No utilice productos químicos para limpiar las partes de este producto. Limpie los vidrios solo un paño de algodón y agua limpia.
5. No golpee el cristal con objetos afilados.
6. No utilice productos corrosivo sobre la superficie de los vidrios.
